CONSTRUCTION

Date of Construction:	c1907
Architect:	Unknown
Builder:	Unknown
Architectural Style:	Federation
Physical Description:	Timber framed single storey residence with fibro panelling, metal hipped roof and extensive verandah. The verandah is of stumped construction with timber retaining and accessed via brick steps. The canopy is open to the underside, supported on timber columns and has a non-original timber balustrade. The property features timber framed casement windows and Georgian style French doors with a large brick chimney with brick corbelling.
Method of Construction:	Timber framed construction, fibro panelling, corrugated metal roof
Condition:	Good

HISTORICAL	
<p>The property was originally part of the large landholding of 1000 acres granted to John Septimus Roe in 1844 which was transferred to Robert Henry Rose in 1881. The property remained in the Rose family until c1907 when it was transferred to John Samuel Gibbs of Roelands. The physical form of the building suggests it was built in the early 20th century which would coincide with its purchase by John Gibbs.</p> <p>The property was transferred to his son Barnett Beveridge Samuel Gibbs and his wife, Glancia. Their home was known as 'Battlescombe' at this time.</p> <p>The Gibbs family retained the property until 1931 when it was transferred to Arthur Evans Jackson (1879-1939). This is when the name 'Chenar' is first seen in contemporary documents. Arthur Jackson was a prominent Perth businessman and 'Chenar' was a well respected cattle stud farm during his ownership. The alternate spelling 'Chenour' is a later alternative of the name.</p>

CONSTRUCTION

Date of Construction:	1911
Architect:	Thomas Rose
Builder:	Thomas Rose
Architectural Style:	Federation
Physical Description:	The farmhouse is set back from the roadside along Seven Hills Road on an elevated position. The house is of timber framed construction with weatherboard cladding and metal hipped roof. An extensive verandah wraps around the building. The windows are a combination of original timber framed sash openings and replacement aluminium framed windows.
Method of Construction:	Timber framed, weatherboard cladding, corrugated metal roof, timber framed sash and aluminium windows

Condition:	Good
HISTORICAL	
<p>Edge-hill is the name of the property and farmhouse established by Thomas Hayward Rose (1888-1973). Thomas Rose built the house in 1911. It consisted of four rooms surrounded by a verandah on all sides. The kitchen and laundry were separated from the house. The house was built of timber and the inside walls were lathe and plaster. A brick fireplace was in the corner serving two rooms; the dining and lounge rooms and large sash windows were in each room.</p> <p>In 1914, Arbour Day was celebrated and trees were planted surrounding the house on all sides, of which the Norfolk Pine is the only one remaining.</p> <p>Tom Rose enlisted in the 11th battalion and was a sniper at Gallipoli and then fought in the Western Front in France. He was awarded the Military Medal and after being wounded in France was sent to England to recover before returning to WA before the end of the war. In 1919, Tom Rose married Winifred Williams they had five children.</p> <p>The house had renovations between the wars when a kitchen and bedroom were added to the east side of the house. The verandah at the back was enclosed with a laundry behind the kitchen (in the north east corner). A bathroom was added in the northwest corner and the verandah on the west side was enclosed as sleep-outs. The verandah at the south (facing the valley) remained open and it went along the front of the added bedroom.</p> <p>In the 1950s the property was transferred to one of the children of Tom and Winifred, Gerald Hayward Rose.</p> <p>The house had further renovations in the 1970's when the inside fireplace was removed and the lounge and dining rooms were opened to make one room. The copper in the laundry was removed at this time along with the original stone troughs. The additions were primarily constructed of timber and fibre sheet cladding, including asbestos.</p> <p>The roof of the house has always been corrugated iron.</p> <p>The house is still owned by the Rose family today [2014].</p>

HISTORICAL

This site was the location of the Public Works Department Depot for the administration of the construction of the diversion

dam at Wellington. Many of the unemployed men out of work as a result of the Depression sought work on this project and were housed in tents near the town.

The Public Works Depot which was located on this site was a central point for the distribution of work and information. Irrigation works continued in the area until the 1950s.

The site is now [2014] occupied by a residence built in 1961 which has no relationship with the former use.

HISTORICAL

The small townsite of Roelands was originally known as 'Collie River Crossing' and later 'Collie Siding' when the railway went through in 1893. In 1898, the Colliefields railway was constructed which bypassed Collie Siding and went straight to Brunswick which lessened the activity in the town.

The Roelands Hall was built in 1925 at the instigation of the local community. The land was donated by a local resident, (a woman who did not want to be named in the local press). The hall was built by Mr Bunning and Mr Coles and the hall was opened on 16 October 1925 with a ball and the opening ceremony performed by Mr W. J. George MLA.

The hall has been substantially altered externally although internally it retains much of the original fabric. The hall continues to be well used by the community for a variety of functions.

The hall was managed by the Roelands Progress Association prior to being handed over to the Shire of Harvey.

Theme:	Social and civic activities: community services and utilities

HISTORICAL

The Roelands Quarry was established on Jack Poller's property to supply granite rock for a breakwater designed by C.Y. O'Connor at Bunbury port. The first load was tipped, ceremoniously, by Premier John Forrest on 27th April 1897.

Large boulders weighing up to seven tons, were carted down the steep gradient to 'Collie Siding' by a small locomotive named Nunnagine. It was housed in a shed later used as an office by the Public Works Department while the Wellington Dam irrigation scheme was developed. Another engine, Kia Ora, served there from 1949.

The quarry caretaker, John Sarre, lived on nearby railway land. After the Brunswick to Collie railway line opened in 1898, Collie Siding became known as Roelands.

During World War II, when jobs were scarce, there was some ill feeling expressed by local residents when 14 of the 86 quarry employees were Italian men. Bunbury Mayor G.E. Clarke lobbied unsuccessfully for further Government finance to expand the quarry.

The quarry operated on and off for many years. In later years private contractors have crushed the rock for use on railway lines as ballast.

<p>The small townsite of Roelands was originally known as 'Collie River Crossing' and later 'Collie Siding' when the railway went through in 1893. Due to confusion with nearby 'Collie' gazette in 1897, the name was changed to 'Roelands' after the nearby farm originally granted to John Septimus Roe. The settlement grew in the late 1890s and local residents applied to the government for a school.</p> <p>In 1895, there were 21 children living at Collie Siding and those who were able travelled to Frogmore (Brunswick). At this time a private school was operating in the Catholic Chapel at Roelands (Collie Siding).</p> <p>On 6th January 1903, approval was given to open a school in the Anglican Church building owned by Mrs Rose. On 3rd February 1903, Miss Agnes (or Agatha) McGuckin opened the State School with an enrolment of 27 students. This building was inadequate for the purpose and the Public Works Department prepared plans for a school and teachers quarters. The building consisted of a single roomed school and a simple teachers quarters of two rooms. The contract to be completed by 4th January 1905 was let to A.T. Brine for a tendered fee of £300.</p> <p>Mrs A.E. Pine commenced teaching at the new school building on 28 November 1904, well in advance of the scheduled completion of the building. The teachers quarters proved to be inadequate almost immediately with several requests to the Education Department to improve the facilities for the generally single women who taught at the school.</p> <p>In 1917, the Wokalup school building was transferred to Roelands for conversion to a more appropriate teacher's quarters. This was undertaken by H. W. Doubikin for £146 and at the same time the school room was extended by removing the partition to the former quarters.</p> <p>In 1922, a dedicated teacher's quarters was built. In 1935, a new classroom was built and in subsequent years a library and staffroom.</p> <p>Roelands School functioned until 1996 when the River Valley Primary School opened in Burekup.</p> <p>The school continues to be used for an educational purpose [2014].</p>

Date of Construction:	1930s – mud brick cottages 1940s, 1950s, 1980s
Architect:	
Builder:	
Architectural Style:	
Physical Description:	Complex of buildings of various styles and construction methods arranged around a central green oval and located on a remote hillside with a rural setting. The buildings are generally of conventional construction methods being brick or

	timber framed. There is one mud brick cottage which is in poor condition.
Method of Construction:	Various
Condition:	Poor to good
HISTORICAL	
<p>The "Seven Hills" property in Roelands was once owned by Benjamin Piggott of "Springhill" on the Coast Road. The property was transferred to W. B. Castieau for the first few decades of the century who ran sheep there and on leased land in the Worsley - Ferguson area. The property was transferred to Mr Albany Bell, a well-known Perth businessman, who, with Thomas Charles Chandler, promoted it as a haven for unemployed boys in the Depression years of the 1930's. They wanted to help these boys to maintain themselves, and to learn farming skills, which would be useful, and help them obtain work. Mr Bell approached many of his business friends in Perth to develop this idea.</p> <p>On 15th November, 1932, an advance party of seven boys, under the manager R. M. Ladyman, set up camp on the property. Over the next six years, from 16 to 20 boys were in residence, developing the orchard and farm, and achieving Messrs Bell and Chandler's aim of learning new skills, growing food to support themselves, and enough to sell as well. The mud brick cottages still remaining on the site were constructed under the "Chandler Boys' Scheme" as the initiative was sometimes known.</p> <p>In October 1938, the United Aborigines Mission was given permission by Mr Bell to use his property to establish "The Native Mission Farm, Roelands". The mission was partly self-supporting from the orchard, with a garden producing more than sufficient for their domestic needs by the end of the year.</p> <p>Mr Thomas Price, who had been on the Committee of Management of the Chandler Boys' Settlement, continued his interest in the Native Farm, and gave valuable advice on the establishment of "the fruit grove". This became a real "back stop" to the farms' finances.</p> <p>Gradually, the Mission expanded and at times had as many as 100 children, and 25 missionaries and their children living there. Irrigation and domestic water was drawn from the Collie River where a dam was constructed. With the fertile river flats, the orchards of grapefruit and stone fruit were very productive.</p> <p>The Mission closed in 1975 and the property was subsequently purchased by the Indigenous Land Corporation. The complex now houses and provides training for Indigenous families.</p>

SIGNIFICANCE	
Level of Integrity:	Moderate
Level of Authenticity:	Moderate
Level of Significance:	Considerable
Statement of Significance:	
<ul style="list-style-type: none"> The place has historic value as a demonstration of the approach to education of boys in the early 20th century and the role of philanthropists in the community. The place has historic value for its association with local settlers Benjamin Piggott and W Castieau; businessmen Peter Albany Bell and Thomas Chandler; educators R Ladyman and Thomas Price; and the United Aborigines Mission. The place has social value as a demonstration of the growth in self-determination by the Indigenous community from a controlled mission to self-administered premises. The place has research value as the remnant mud brick cottages built during the period of the Chandler Boy's Settlement provide evidence of past techniques of education and construction techniques. The place has aesthetic value as a collection of simple buildings in a rural setting. 	
MANAGEMENT CATEGORY:

HISTORICAL

The Roelands memorial was erected by the community to acknowledge those men from the district who gave their lives during World War I and World War II.

It was constructed by the Roelands Progress Association and unveiled by Sir James Mitchell in 1947.

The plaque on the memorial reads:

In Memory Of Those Who Gave Their Lives For The Empire
AIF 1914 - 1918 W J Bell, D Colton, J Gibbs, J Munroe, J Rafferty, J Tate, J L Thompson.
AIF 1939 - 1945 C F Rose
RAAF 1939 - 1945 C Y Clarke, R M Clarke
"Lest We Forget"

The memorial continues to be the location of annual memorial services.

HISTORICAL

The name Shenton Vale derives from the first land grant of 9,446 acres (Location 5) to William Kernot Shenton in 1830. In 1838, he sold 3,250 acres to Richard Wells who called the property 'Bon Alliance' and who grew Harvey's first garden.

In 1879, the property was bought by Robert Henry Rose and Maria Rose of the adjacent property 'Roelands Park'. In 1910, the property was transferred to William Allnutt Rose and his wife Bertha Kate Rose. They named the property 'Shenton Vale' and the farm consisted of 600 acres at that time.

In 1970, the property was transferred to Don Bradman Rose and Margaret Rose. The property continues to be held by the Rose family.

CONSTRUCTION

Date of Construction:	1954
Architect:	Unknown
Builder:	Volunteer labour
Architectural Style:	Post-war
Physical Description:	The former church has now been converted into residential use. Predominantly single storey painted brick construction. The pointed window arches are of brick construction with the arch formed by two rows of unpainted brick voussoirs. A cross has been created in the gable by using the headers of bricks in their unpainted state to create the contrast between the

	decorative element and the remainder of the façade. A substantial addition has been constructed since its conversion to residential use. The elevation extending along Colton Street has retained its ecclesiastical aesthetics with pointed arch windows being interspersed by brick buttresses with painted raked cappings. The white painted elevations have been enlivened by brick quoining to the corners of the building and brick window sills and reveals. The gabled roofs are corrugated metal.
Method of Construction:	Concrete and Tile
Condition:	Good
HISTORICAL	
<p>The small townsite of Roelands was originally known as 'Collie River Crossing' and later 'Collie Siding' when the railway went through in 1893. Due to confusion with nearby 'Collie' gazetted in 1897, the name was changed to 'Roelands' after the nearby farm originally granted to John Septimus Roe.</p> <p>The settlement grew in the late 1890s and as a demonstration of its establishment a small wooden building and a parcel of land was donated to the Anglican Community by Mrs Rose for use as a church. The simple building, which was never consecrated, was adapted and renovated throughout the first half of the twentieth century and was also used as a school.</p> <p>The condition of the building deteriorated and despite the setbacks of the Depression and World War II, the community fundraised to build a new church.</p> <p>On 21 October 1953, the Right Reverend D. L. Redding Bishop of Bunbury laid a foundation stone for the new church. The church made of concrete bricks was completed in in 1954 with a considerable volunteer effort from local families.</p> <p>The church building is currently [2014] used as a residence. The sheoak pews which were formerly in the church have been relocated to the hall adjacent to St Peter's in Brunswick Junction.</p>

CONSTRUCTION

Date of Construction:	1910
Architect:	Eustace Cohen
Builder:	Unknown
Architectural Style:	Federation (much altered)
Physical Description:	Single storey residence built into the hillside. The house is of brick construction with corrugated metal roof, extensive verandahs and broad chimneys running up the exterior of the building. The verandah has concrete retaining, masonry piers with broad solid bases and shaped upper columns. The verandah roof continues from the main roof but is at a shallower pitch than the main roof. Windows have been

	replaced with aluminium frames.
Method of Construction:	Brick, corrugated metal roof, aluminium framed windows
Condition:	Poor
HISTORICAL	
<p>The farming property known as Wedderburn Park was granted to Dr John Ferguson in 1842, the doctor for the WA Company scheme which was based in Australind. He named the property 'Wedderburn' after his wife Isabella's forebears.</p> <p>Development of the farm was primarily due to one of Ferguson's indentured servants, Alexander McAndrew. McAndrew acquired the property in 1846 and in turn leased it to Thomas Hayward and Mrs Rose. McAndrew died in 1899 and the property was transferred to Edwin Rose (1863-1948) who married Janet Clark in 1902.</p> <p>During the 1850s the property was occupied by John Crampton (1831-1906). John Crampton had arrived in the colony in 1842 and settled with his parents in Australind before taking up Wedderburn for 15 years. Crampton went on to establish the property which was later known as 'ViewBank' near Brunswick.</p> <p>This homestead is the second on the property and was built c1910 by Edwin Rose for his family consisting of his wife and two daughters. Edwin Rose was a MLC, JP and member of the Brunswick Road Board and he held other voluntary community positions.</p> <p>The architect of the new residence has not been confirmed however it is noted that architect Eustace Cohen did advertise for tenders for builders to undertake minor works at 'Wedderburn Park' in 1910. It is likely he oversaw the design and construction of the new homestead.</p> <p>The home was the venue for many social gatherings in the district and in 1913 accommodated the Governor during a visit to the district.</p> <p>The farm was acquired by Thomas Talbot in 1927. In 1952 considerable alterations were undertaken at the homestead including the removal of the prominent tower and roof gable. The iron roof was replaced by tiles but in later years this was proved to be too heavy for the structure and the tiles were removed in favour of corrugated iron. Much of the interior detail of the residence was removed at the time of the 1952 alterations.</p>
