			parate pioneer area marked by an archway.
			Anne Bishop Rose, a simple roughly hewn

	piece of granite and brass plaque is set within its own timber and stone enclosure. The car park is at the foot of the natural path that leads into the cemetery which winds its way through a wooded environment. The gateway is marked by two rendered columns, each of which have plaques bearing the names of those who are laid to rest within the cemetery. Adjacent to the entry is more recent construction of a niche wall with small brass name plaques. The cemetery is still in active use.
Method of Construction:	Various
Condition:	Good

#### **HISTORICAL**

The cemetery of about 20 acres was surveyed by the Western Australian Company in 1841 shortly after the settlers arrived and called the hill Mt Claremont. It was consecrated by the Anglican Bishop, Augustus Short of Adelaide, on the 16 July 1852 when he visited this part of his huge diocese.

All denominations were free to use the cemetery. However, it should be noted that Robert Gainder, an Indian from Belvidere (Belvedere), was buried in unconsecrated ground outside the cemetery in 1896.

The first burial was the Medical Officer, Dr Anthony Carpenter who died in 1841, from the Western Australian Company who came on the Parkfield with the Chief Commissioner, Marshall Waller Clifton, and the first settlers.

Others buried in the Cemetery include Marshall Waller Clifton and his wife Elinor and a number of their descendents, and various members of the pioneering families including the Allnutt, Colton, Perren, Narroway and Rose families.

SIGNIFICANCE	
Level of Integrity:	High
Level of Authenticity:	High
Level of Significance:	Considerable

#### **Statement of Significance:**

- The place has historic value as the first cemetery for the Australind cemetery. Buried at the cemetery are many of the founders of the small community and their families.
- The place has social value as a place for reflection for the families of those buried within the cemetery.
- The place has aesthetic value for its combination of headstones and niche wall in an informally landscaped setting.

The place has aesthetic value for its combination of he	adstones and niche wall in an informally landscaped setting.

Physical Descript	tion:	made in the form meters high. It is cement capping midpoint of the st	astern shore of the estuary, the memorial is n of a short stone wall approximately 2.5 constructed of random coursed granite with and a horizontal band of cement at the cructure. The base on either side of the wal one bench and a metal plaque describes the t Australind.
		Settlement [on W	on the plaque reads: "The Australing (akefield Principles] was formed in 1844 or e of Leschenault Inlet by the Westerr

	and the division of 100,000 acres into small farms was planned. Through causes beyond the control of settlers and despite the labours of the Chief Commissioner, Marshall Waller Clifton F.R.S., the achievement fell short of the vision.  This memorial recalls the vision and commemorates those hardy pioneers who continued to labour here in the face of great difficulty and records the benefits Western Australia received from the coming of settlers and officials on the ships:  Island Queen - December, 1840; Parkfield - March, 1841; Diadem - April, 1842 and May, 1844; Trusty - December, 1842."
Method of Construction:	Granite, cement
Condition:	Good

#### HISTORICAL

The memorial stone was erected by the Royal Western Historical Society in 1938 by public conscription to commemorate the original European settlers who first arrived in the area in 1840.

The first ship to arrive, 'Island Queen' brought an advance party made up principally of surveyors. The 'Parkfield' arrived with the Clifton family and other colonists. The 'Diadem' and 'Trusty' followed bringing more people to Australind. By early 1843 the venture was failing although the 'Trusty' returned with a small group of colonists in May 1844.

The colonists consisted of 'settlers' who had purchased land and 'labourers' dependant on the settlers. Both groups immigrated with dependent families. Many people moved away to the small township of Bunbury, surrounding areas or further afield. Today, a number of descendants reside in relatively close proximity to Australind.

#### HISTORICAL

A government school was established at Australind in 1905. Prior to that time schooling was undertaken within private homes and for some years within the small timber building which is now St Nicholas Church. A school was also located at "Parkfield" and many local children travelled long distances to be taught there.

The school was built by local residents George and Joseph Rodgers, and George Pearce.

The Australind School was subject to closure when the numbers of children in the district declined.

The school finally closed in 1948 and was demolished a few years later. The pine trees and lemon-scented gum tree on the site are believed to have been planted by students when the school was functioning.

In 1992, a plaque was erected by former students to commemorate the site.

	Belvidere was a house that was open to many who wanted to stay for all sorts of reasons but were all joined in their quest to live an alternative way. The house has long been demolished with the farming land returning back to its natural habitat and is now known as the Leschenault Peninsula Conservation Park. The site now incorporates campsites amongst the tuart forests and offers a range of passive recreational opportunities.

LUCTORIONI	

#### HISTORICAL

Charles Robert Prinsep, barrister and standing counsel to the East India Company of historic Belvidere, Calcutta, India, purchased land in Western Australia, originally Hudson's grant on the Leschenault Peninsula, Location 7.

On his behalf, Thomas Little arrived in 1838, built a homestead called Belvidere and began a horse breeding venture, aimed at providing remounts for the British Indian Army. The Prinsep Estate sent out Indian workers from their estate in Calcutta. Two herds of cattle were introduced; English and Bengali water-buffalo used for heavy work. These animals were herded on the northern end of the peninsula by Thomas Jackson who later sheltered Fenian escapee, John Boyle O'Reilly.

Thomas Little left Belvidere in 1852. Another manager, William Bedford Mitchell, took over and exported horses and jarrah sleepers to India. From 1869 to 1878 Belvidere was managed by Charles Prinsep's son, Henry Charles, artist and public servant, who married Charlotte Josephine Bussell in 1868. Financial problems caused the sale of the property to William Henry Venn of Dardanup.

Belvidere homestead, used as a summer retreat, burnt down before 1900. In about 1936 the replacement and a jetty built by his son, Frank Evans Venn, also burnt down.

Ownership changes over time included Lewis McDaniel, D.N. McDaniel and Albert Bastow. By the 1970s, Belvidere became a small alternative lifestyle commune of fourteen homes in the possession of Wally Greenham and Shirley Rodda.

Belvidere, one of the district's early estates, is now the Leschenault Peninsula Conservation Park, managed by the Department of Environment and Conservation.

#### HISTORICAL

Cathedral Avenue is part of the original Old Coast Road which runs from Mandurah to Australind. This road was gradually formed by settlers exploring northwards from Australind and by the 1870s to 1890s mail coaches travelling from Perth to Bunbury followed a track to Pinjarra crossing over to the Coast Road before heading south to Bunbury.

The origin of the name appears to lie with the paper bark trees on either side of the road which join overhead to form a leafy 'cathedral'.

Physical Description			, also known as Cook's Cottage, is situated
•		on the eastern	bank of the Leschenault Inlet. It was
			362 by James Rodgers, a servant discharged
		from the ill-fated A	Australind settlement.

	The homestead, which consists of two structures at right angles to each other forming an 'L' shape, is constructed with walls of wide, split timber slabs and rough timber battens nailed to each side and plastered with clay and whitewash. The roof is clad with corrugated iron sheets.
	A section of the timber slab walls are in poor disrepair and collapsing. A section of roof has been removed from the rear of the farmhouse. Deterioration of the clay and whitewash render has caused sections of the wall to fall away to reveal the timber battened construction.
Method of Construction:	Timber and iron, clay render
Condition:	Deteriorated

#### **HISTORICAL**

James Rodgers, a convict, arrived on the 'Ramilies' in 1854. After he received his Conditional Pardon in 1862, his employer, Ben Piggott helped him establish a farm on land called Cook's Park on Cathedral Avenue, on the eastern side of Leschenault Inlet.

That year he married Margaret Keenan and they had ten sons. He is recorded as saying that 'he and his old woman lived in a lean-to, then a tent' before the homestead was built. It is believed that this was between 1863 and 1870.

The timber constructed house, situated well back from the estuary to avoid flooding in wet weather, eventually formed an 'L' shape, the result of additions to accommodate the growing family.

Rodgers and his family grew a wide range of produce including wheat, rye, potatoes and fruits, including oranges. He owned cattle, horses and a few pigs.

It is speculated that Cook's Park was used as a staging post for travellers although no documentary evidence has been found to support this assertion.

#### **Statement of Significance:**

- This place has historical value as an excellent example of a farmhouse building constructed in the 1860s.
- The place has historic value for its association with the Rodgers family who made a valuable contribution to the development of agriculture in the district.
- The place has aesthetic value as a collection of weathered buildings in a landscaped setting.
- The place has research value for its demonstration of past building techniques which can be readily seen in this deteriorated condition.

MANAGEMENT CATEGORY:  The place should be retained and conserved unless there is no feasible and prudent alternative to doing otherwise.  Any alterations or extensions should reinforce the significance of the place, and be in accordance with a Conservation Plan (if one exists)	deteriorated conditions

#### HISTORICAL

William Dacres Williams and his wife arrived in Australind aboard the 'Parkfield' in 1841. He built the 'Prince of Wales Hotel' which operated as a tavern and wayside inn from 1842/1843 to 1845. In 1843, Williams sold the tavern to James Witt for £200. By 1844, Witt was preparing to leave the colony and sold the land and buildings for £25 to John Allnutt who had arrived on the 'Trusty' in 1844. They named their new home Henton Cottage after John's English home village of Henton.

John Allnutt and his wife Sarah established their residence and general merchants store there in 1845 and that function continued until John Snr's death in 1861. They raised two children at Henton Cottage, John and Anne. John Jnr leased Rosamel farm and later established Nelson Grange at Bridgetown. Anne Allnutt married Robert Henry Rose, owner of the property, Parkfield.

Henton Cottage's function as a shop and residence is believed to have continued up until the late 19th century.

It had a number of owners before the cottage was bought by Phil and Holly Nutley in 1976. They painstakingly restored the cottage to its original condition along with a blacksmith's shop, outbuildings and stables. It was open to the public as a living museum. The outbuildings were demolished to make way for the Australind Shopping Centre built in the late 1980s. Henton Cottage is currently [2014] used as a retail premises.

Statement of Significances		

#### Statement of Significance:

The following statement is drawn from the entry documentation for the place in the State Register of Heritage Places: Henton Cottage, a single storey timber framed building in the Old Colonial Georgian style clad with jarrah weatherboards and a shingle roof, has cultural heritage significance for the following reasons:

- The place was built and established as a hotel by one of the first Australian settlers, the Williams family, who arrived under the sponsorship of the short-lived West Australian Company's land settlement scheme in the early 1840s to establish a farming community in the Australian area complete with its own townsite;
- The place is rare as one of the three oldest, extant buildings constructed in the original Australind townsite in the 1840s, and together with Upton House (c. 1844) and Church of St. Nicholas (c. 1844) forms a very significant collection of historic buildings;
- The place is the earliest known and still extant purpose-built inn/hotel in the State; and,
- The place is a rare intact example of a timber and shingle building dating back to the early years of European settlement.

#### **HISTORICAL**

John Boyle O'Reilly (1844-1890) was an Irish Fenian sentenced to death in 1866 by the Crown, which was later commuted to a life sentence in the colonies. In 1868 he was transported to Fremantle where he joined a work party on the Bunbury - Vasse Road.

While in Bunbury, O'Reilly formed a strong friendship with the local Catholic priest, Father Patrick McCabe. Late in 1869, McCabe offered to arrange for O'Reilly to escape the colony. On 18 February 1869, O'Reilly absconded from his work party, and met up with a party of Irish settlers from the local town of Dardanup. Together they rode to the Collie River where a rowboat was waiting for them. They rowed out of the Leschenault Inlet into the Indian Ocean, and north about twelve miles up the coast. O'Reilly hid in the dunes, awaiting the departure from Bunbury of the American whaling ship Vigilant, which Father McCabe had arranged would take him on board. The ship was sighted the next day, and the party rowed out to it, but the captain reneged on the agreement, and the Vigilant sailed off. O'Reilly had to return to the shore and hide again while his friends tried to make arrangements with another ship. After two weeks, they succeeded in making a deal with the captain of the American whaler Gazelle. O'Reilly and his friends met the Gazelle three miles out to sea on 2 March, and he was taken on board.

After further complications O'Reilly finally arrived in Philadelphia in November 1869. He settled in the United States and married and had a successful career as a journalist and poet.

In 1875, O'Reilly was involved in a scheme to rescue six Fenian prisoners from Fremantle. Despite a skirmish with a government ship, Georgette, the American whaler Catalpa successfully brought the prisoners to New York in August 1876.

The memorial and interpretive panels were erected in 1988 and unveiled by former Premier of WA, Brian Burke.

#### HISTORICAL

On 15 April 2010, a new concrete bridge over the Collie River was opened replacing the last timber bridge that had been constructed in 1962. Like the three previous timber bridges before it, the present structure is strategically located near the mouth of the Collie River at the confluence of three shires; Dardanup, Bunbury, and Harvey.

The first bridge was proposed by W.A. Company Commissioner M.W. Clifton as early as 1841 and was designed and built by his son, William Pearce Clifton in 1848, prior to the convict era in the W.A. Colony. Local support was crucial to provide labour and raise an extra £50, to augment £300 of Government funding. Timber was sourced locally and milled at Alverstoke.

The heavy winter rains necessitated two sturdy bridges over the Preston (built 1846) and Collie Rivers to serve as an important link for immigrants who settled at Australiad on the shores of Leschenault Estuary and their nearby centre of business, goods, markets and trade at the port of Bunbury.

The first bridge was replaced in 1911 with a one-lane bridge and fishing platform. This in turn was replaced in 1962 by a third timber structure which incorporated a two-lane bridge and fishing platform.

The 1848 bridge remained in situ until early WWII, when Army Sappers practised their 'explosive' skills on the old structure and destroyed it. However, remnants of the original bridge remained until 1962 when Main Roads started to construct the third replacement bridge. When the original bridge was removed, Main Roads workers found that the piles of the 1848 bridge had been driven in through compressed wool bales, possibly an old method to curb slippage on the silty bottom.

The official nomenclature of Australind Bridge is not commonly used, as most locals prefer the name of Collie River Bridge.

## HISTORICAL

There has been a bridge at this site since 1843 when the first bridge was constructed on the site. Its construction enabled the further settlement of the district.

A second bridge was built c1930.

The current bridge was built in 1969 and was upgraded with a bitumen overlay in 2003.

Condition:	Poor to fair	

#### **HISTORICAL**

"Parkfield" was named for the ship of the same name which arrived in Western Australia in 1841 with the first group of land purchasers and emigrant workers.

In 1831, William Hudson was granted 2560 acres on the north side of Leschenault Inlet. The grant was resumed in 1841, sold to William Knight who installed tenants Benjamin Piggott and Ephraim Clarke and their families on the property who developed the property. In 1855, the farm was leased to Robert Henry Rose who further developed the property.

He married Ann Bishop Allnutt in 1857. In 1861, Robert Rose secured ownership of Parkfield and built a home from on-site limestone and jarrah. It was a shingle roofed dwelling that included a cellar.

After Ann Rose died in 1864, leaving five sons, Robert married Elizabeth Teede who bore him another fourteen children. Additions were made to the home as required.

Robert Rose died in 1901. His son, George, continued to manage the increased land holding until the Rose family sold in 1913 to Cargeeg. Subsequent owners were, Morgan, Talbot, Bonny, Henning and Smith. Morgan Smith and his son Paul farmed the property until it was sold in 2010.

The home was in disrepair when Bill Bonny bought it in 1947. He cleared away old, neglected additions, filled in the dangerous old cellar and updated the farm infrastructure. When, in 1951 he sold to Eric Henning, only the original four room limestone 'core' of the home stood. Henning added several rooms and a tiled roof.

Over more than 100 years, Parkfield has seen community service in many ways – as a school, church, wedding venue, voting place, telephone exchange and a meteorological station.

#### **HISTORICAL**

Point Lautour is named after the original land owner of the large portion of land north of the Collie River. Colonel Peter Augustus Lautour was an Anglo French military officer who made a significant investment in the Swan River Colony. He never visited the colony but his representative Richard Wells selected a holding of 103,000 acres known as Wellington Location 1 in 1830.

His land was transferred to The West Australian Company which was responsible for the establishment of the settlement at Australian. Some of the first settlers who were part of the scheme were Lautour's indentured servants.

A survey of the land was undertaken in 1840 by surveyor H.M.Ommaney and in his fieldbook the name is first recorded as Point Lautour.

In 1879, it was noted in *The West Australian* that the land was being transferred to Benjamin Piggott and the description of the lot includes a reference to a tree on the point marked with two horizontal lines as a survey reference marker. It is believed that this tree still exists on the site.

The swampy land to the east of the Point is known as the "mier" a Nyoongah word.

The strain py tand to the east of the form to the fine time. A try configuration

	hipped with corrugated iron cladding with timber crosses. Doors are ledged and the windows timber framed. Internally it is simply furnished with exposed roof timbers and features memorial plaques to pioneering settlers.	
	The church was damaged in December 2012 by a vehicle crashing into it but has since been repaired.	
Method of Construction:	Timber and metal clad roof	
Condition:	Good (repaired 2013)	

#### **HISTORICAL**

The Church of St Nicholas stands on land originally purchased by James Narroway from the Western Australia company. It was built in 1840 as a small two roomed cottage residence which Narroway shared with his wife Sarah.

John Allnutt Sr from Henton Cottage instigated the establishment of the Congregational Church in Narroway's former residence and he was the first lay reader. Under Allnutt, the dividing wall was removed, a pulpit installed and four pews made. The church was opened in September 1850 and from that date Allnutt also taught school there. He continued to hold services until his death in 1861 and was succeeded by Rev. Andrew Buchanan of Bunbury who walked from Bunbury to conduct services and Sunday School. Buchanan and the Anglican Rector of Picton, The Rev. Archdeacon Wollaston shared the church for services.t The church was acquired by the Church of England and dedicated on 23 December 1915 as St Nicholas Church by Anglican Bishop, Frederick Goldsmith. It was so named after the church in Skirbeck, Lincolnshire, England where the Rev. John Frewer, an Anglican Rector for South Bunbury and from 1929 Bishop for the North-west Australia, had served his curacy.

The church was cared for by the Clifton family and is reputed to be the smallest church still standing in the country.

On the festival of St Nicholas in 1993, the church became a parish in its own right and a new Rectory was constructed in 1994. Whilst the building no longer hosts regular church services, weddings, baptisms and funerals may still be held there.

Level of Significance:	Exceptional

#### **Statement of Significance:**

The following statement is drawn from the Register Entry for inclusion of the place in the State Register of Heritage Places in 2009:

Church of St Nicholas, Australind a single-storey timber building with a corrugated zinc coated steel roof set in a landscaped garden, built c.1844 as a residence in the Old Colonial Georgian style and converted to use as a church in 1850, has cultural heritage significance for the following reasons:

- The place is a substantially intact and rare example of the type of dwelling erected by Australiad colonists following their arrival in Western Australia;
- The place is a rare example of a colonist's first cottage which has retained its original form rather than becoming part of later extensions;
- The place has value as a landmark in Australind due to its continuity of form since the 1840s and function since 1850; together with the adjacent properties of Upton House and Henton Cottage, the three properties form a significant precinct;
- The pews are a good example of colonial church furniture and other items, including altar table, font, and pedestal, and contribute to the aesthetic and historic significance of the place;
- The place is closely associated with several families who were significant in the establishment of Australind town, district and the wider Shire of Harvey; prominent among these are the extended family of Marshall Waller Clifton, Chief Commissioner for the Western Australian Company who instigated the settlement at Australind; the place is also associated with John Allnutt who instigated the establishment of the Congregation Church in the former residence and was its first lay reader; and William and Sarah Narroway who resided in the building from 1844 to 1850;
- The place is valued by the community of Australind and the surrounding district for its association with the Congregational church from 1850 to 1914 and the Anglican Church from 1914 to the present (2008); and,

The place has potential to reveal information on building techniques used by the European settlers at Australind, representing techniques commonly practised in the 1840s.

## **MANAGEMENT CATEGORY:**

The place should be retained and conserved unless there is no feasible and prudent alternative to doing otherwise. Any alterations or extensions should reinforce the significance of the place, and be in accordance with a Conservation Plan (if one exists)

#### **HISTORICAL**

This site marks the farmhouse of one of the earliest settlers in the district, William Kernott Shenton (1802-1842). Shenton was an engineer & architect who arrived in the colony in 1829. He built a horse mill at Fremantle in 1830/1 in which he ground the colony's first wheat, while hand-writing an early newspaper. He established the 'Old Mill' at South Perth in 1835 and was architect of Samson's Fremantle office.

In 1830, he selected 9546 acres in Leschenault and 100 acres in Helena District. Shenton was a member of several exploration trips in the district in the 1830s which provided information to potential settlers and the government. In 1839 he sent stock to his Collie River grants. Shenton lived in Perth and visited his grants where he established a hut for a manager. A review of the works undertaken by Shenton to improve the lands in 1840 noted that buildings were present on the site and portions of the land were cleared.

Shenton drowned in 1842 whilst on a voyage to see his land grants. The land was transferred to John Allnutt in 1844 who continued to engage men to work the property whilst he lived in Australiad. The property (location 2) was later transferred to Edward Hamersley, a substantial property owner, who continued to lease the property to Allnutt.

As the majority of travel was by boat during this period it was logical that a small jetty was constructed adjacent to the former residence. The choice of the site for the house was also dictated by the presence of a spring.

residence. The shorter of the heads that allot allotated by the presented of a spring.

## **Statement of Significance:**

- The place has historic value for its association with the first European settler on the property, William Kernott Shenton and later owner John Allnutt
- The place has research value as the site has archaeological potential as it is still relatively undeveloped.
- The place has aesthetic value as its mature trees adjacent to the river with the remnant jetty structure create a pleasing setting

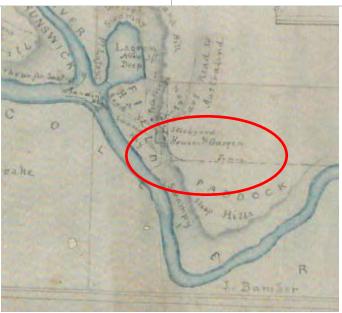

predsing setting.

Condition:	Good

#### **HISTORICAL**

Benjamin Piggott firstly acquired by purchase land, of a Land Order in England, prior to his departure. Benjamin and Sarah Piggott arrived aboard the 'Trusty' in May 1844 with one child and brother James Piggot. On his arrival at Leschenault, aboard the Trusty on 23rd May 1844, he was allotted No 18 Victoria Road, Australind. The Piggotts were tenants on 'Parkfield' for ten years where they established a farm and had five more children.

After finding that his allotted Land Order of No 18 Victoria Road unfavourable, he with fellow Buckinghamshire gentleman Ephraim Clarke entered into a partnership on Wellington Location 14 belonging to William Knight as tenants and built the first homestead there out of the virgin bush. This was to be named Parkfield after the boat that had brought Ephraim Clarke and his family to Australind in 1842. All of Benjamin and Sarah Piggott's children were born at Parkfield except for their first born Sarah.

Mr Rose had secured ownership of Parkfield in 1861 from William Knight, so, thus prior to this time, Benjamin had decided that he was going to purchase land north of Parkfield which he did in 1860 which was Wellington Location 17. A Memorial Registered of an Indenture of Conveyance made the twenty seventh day of February one thousand eight hundred and sixty to Benjamin Piggott of Australind, of six hundred and fourty acres.

Sometime after the purchase, Benjamin Piggot built a temporary building to house his family, running East to West approximately 40-50 feet long was built. Remenants of floor was found in 1980 with some pieces of wood coming to the surface. Later when house was built, there was a corridor running from house to temporary house.

On the 5th of Dec 1862 agreed with Local builder Mr Ward with the help of convict labour, built a two storey limestone house, walls 46 feet in length and 28 feet wide. During the next week the men were burning lime-stone in the kiln and on the 12th Dec 1862 the house foundation was laid.

All limestone for the homestead was excavated from the Springhill land which was in abundance .Also, the limestone from Springhill was used for the Foundation of both the Bunbury Hospital and the Congregational Church in Bunbury.

A limestone well that was used for water for household purposes, flowed from a permanent spring, is still standing, but is no longer in use, due to the market gardens that have been established to the east of it. It was dug from pure solid limestone.

Over the years he added considerably to his holdings. He was a successful farmer and produced wheat, barley, horses for the Indian Army, cattle, potatoes, mulberry wine for the Melbourne market, fruit, butter, cheese, eggs and poultry.

Piggott employed a number of convicts, recorded written contracts with them and built timber cottages for married couples. He once took in an orphaned boy aged nine, son of William Goodall who was accidentally killed, and indentured him as a servant for seven years.

Benjamin Piggott died in 1892. Sarah lived on for another fifteen years. Both are buried in Springhill cemetery which was consecrated in 1882 and continues to be used for the Piggott family.

The house has been added to and altered in recent years.

Descendants of Benjamin Piggott still own the property.

## Springhill Private Cemetery

Springhill Private Cemetery was consecrated on the 2nd September 1882 by Bishop. Those of whom are known to have been buried in Springhill Private Cemetery is as follows (note H.S denotes Headstone):

Benjamin Piggott Died 1892 H.S and his wife Sarah died 1907, H.S Charlotte Piggott Died 1912, H.S.

Mary Caroline Died 1912 H.S both unmarried Thomas A. Piggott died 1927.H.S, Benjamin Piggott 1935 Jr. H.S both unmarried.

Sarah E.Clarke nee Piggott died 1928

Sarah E. Clarke nee Piggott died 1901, dau of above.

Ephraim M. T. Clarke 1875,

#### **Statement of Significance:**

- The place has historic value for its association with the Piggott family who were important to the establishment and development of farming in the district.
- The place has research value as an example of a mid 19th century residence built with convict labour and may demonstrate techniques no longer practiced.
- The place has social value for the Piggott family as many generations have lived and been buried on the property.

	crafted French doors and internal staircase.
	The original house is the two storey section. Earlier timber additions were replaced with brick additions in the 1960s with further alterations having been undertaken in the 1990s and in 2006.
	The property is not the subject of a conservation plan but in 2014 the current owners engaged a specialist conservation company who applied a technique of repairing worn and damaged brick work to the Western side of the main building. This was done carefully machining out the damaged bricks, completely removing them from the wall then turning the brick around and repositioning them prior to re-pointing the mortar. This painstaking and slow technique was applied extensively to the original chimney which had deteriorated and was in poor condition. Following this the original building was re-roofed and the vented eaves were replaced
Method of Construction:	Brick, stone, iron and timber
Condition:	Good

## **HISTORICAL**

Upton House was built by local resident, Pearce Clifton, for absentee owner, Mrs Elizabeth Fry, the English prison reformer and cousin of Mrs Waller Clifton (mother of Pearce Clifton).

The name Upton House is derived from Mrs Fry's residence in Upton Lane, London.

The materials for the house were transported to the settlement in one of the early ships as cargo and used for ballast. This included eight sets of French windows and twelve sets of cast iron windows. Pearce Clifton constructed the home with the use of locally cut jarrah and nails manufactured at Australind. Mrs Fry died in 1845 and her husband sold Upton House to Elinor Clifton, the mother of Pearce Clifton.

In 1844/45 Pearce Clifton and his family moved out and his mother Elinor and father Marshall Waller Clifton moved into the property and it is they who are credited with establishing the splendid gardens at Upton House.

Numerous outbuildings were built on the property but only the former dairy remains as the present day garage. The property remains the property of the Clifton family until the present day [2014].

SIGNIFICANCE		
Level of Integrity:	High	
Level of Authenticity:	High	
Level of Significance:	Exceptional	

#### **Statement of Significance:**

The following statement is drawn from the Register Entry for inclusion of the place in the State Register of Heritage Places in 1998 on a permanent basis.

Upton House, a two-storey brick residence, has cultural heritage significance for the following reasons:

- It is a rare example of an 1840s house in Western Australia demonstrating a sophisticated use of Georgian symmetry and simplicity, and a level of building craft not readily available to the general community;
- The building and its extensive surrounding gardens are a prominent landmark in the Australind area;
- The building is important for its long and close association with the Clifton family, whose members contributed greatly to the development of Western Australia;
- The place was the childhood home of daughters of Marshall Waller Clifton who were important artists in Western

Australian arts history; and,

The building contributes to the community's sense of place, a reminder of the early European settlement of the district.

# MANAGEMENT CATEGORY:

The place should be retained and conserved unless there is no feasible and prudent alternative to doing otherwise. Any alterations or extensions should reinforce the significance of the place, and be in accordance with a Conservation Plan (if one exists)
